

Truck Asset Matchmaking Platform (TAMP)

Testing Summary

Purpose

This document records the functional testing completed for the frontend MVP of the Truck Asset Matchmaking Platform (TAMP).

Testing was performed manually using mock data within a local development environment.

Test Environment

Framework	React + Vite
Styling	Tailwind CSS
Browser	Google Chrome / Microsoft Edge
Data Source	Mock Data
Backend	Not Required (Frontend MVP)

Functional Test Cases

| TC-01 | Register Page | User can enter registration details | Form loads correctly | 
Pass |
TC-02	Login Page	User can log in (simulation)	Login page displayed correctly	 Pass
TC-03	Role Selection	User selects Freight Owner, Transporter or Admin	Correct dashboard opens	 Pass
TC-04	Freight Owner Dashboard	Dashboard displays summary cards	Cards displayed correctly	 Pass
TC-05	Post Load	User can complete load form	Form accepts mock data	
Pass |

| TC-06 | My Loads | Previously created loads are displayed | Mock loads displayed |
✔ Pass |

| TC-07 | Match Recommendations | Matching transporters displayed | Match cards displayed with compatibility reasons | ✔ Pass |

| TC-08 | Accept Match | User accepts a transporter | Navigates to Digital Confirmation | ✔ Pass |

| TC-09 | Reject Match | Reject button functions | Reject action available | ✔ Pass

| TC-10 | Digital Confirmation | Receipt is displayed | Receipt generated successfully |
✔ Pass |

| TC-11 | Trip Tracking | Tracking page displays shipment progress | Progress displayed correctly | ✔ Pass |

| TC-12 | Transporter Dashboard | Dashboard loads correctly | Statistics and actions displayed | ✔ Pass |

| TC-13 | Post Truck | User submits available truck | Form accepts mock data | ✔
Pass |

| TC-14 | My Trucks | Truck list displayed | Mock trucks displayed | ✔ Pass |

| TC-15 | Admin Dashboard | KPI cards and activity displayed | Dashboard loads successfully | ✔ Pass |

| TC-16 | Admin Users | User list displayed | Table displayed correctly | ✔ Pass |

| TC-17 | Admin Compliance | Compliance information displayed | Mock verification records displayed | ✔ Pass |

| TC-18 | Audit Trail | Audit events displayed | Mock activity displayed | ✔ Pass |

| TC-19 | Analytics | Charts/KPIs displayed | Dashboard analytics displayed | ✔ Pass
|

| TC-20 | Sidebar Navigation | Correct links displayed for each role | Navigation changes according to selected role | ✔ Pass |

Responsive Testing

| Desktop | ✔ Pass |

| Laptop | ✔ Pass |

| Tablet |  Pass |

| Mobile Width |  Pass |

Accessibility Checks

The following accessibility checks were completed:

- Semantic headings
- Clear labels on forms
- High colour contrast
- Keyboard accessible buttons
- Visible focus states
- Consistent navigation

Status:  Pass

Known Limitations

The frontend MVP currently uses:

- Mock data
- Simulated authentication
- Simulated tracking
- Local state
- No live backend API
- No database persistence

These limitations are acceptable for the scope of the MVP assessment.

Overall Result

The frontend application successfully demonstrates the complete Truck Asset Matchmaking Platform workflow using mock data.

All critical user journeys required by the assessment were successfully tested and are functioning as expected.
